

solidate imprese ci fa cogliere la forza e l'attualità del "sistema del design" e la sua durata nel tempo.

Avremo dunque ancora modo di abitare i luoghi della "domus" gustando i nostri cibi, percorrendo le fantasie dei nostri sogni, in compagnia delle nostre letture preferite.

C'è in questo un ricreato mondo di dolce vita...

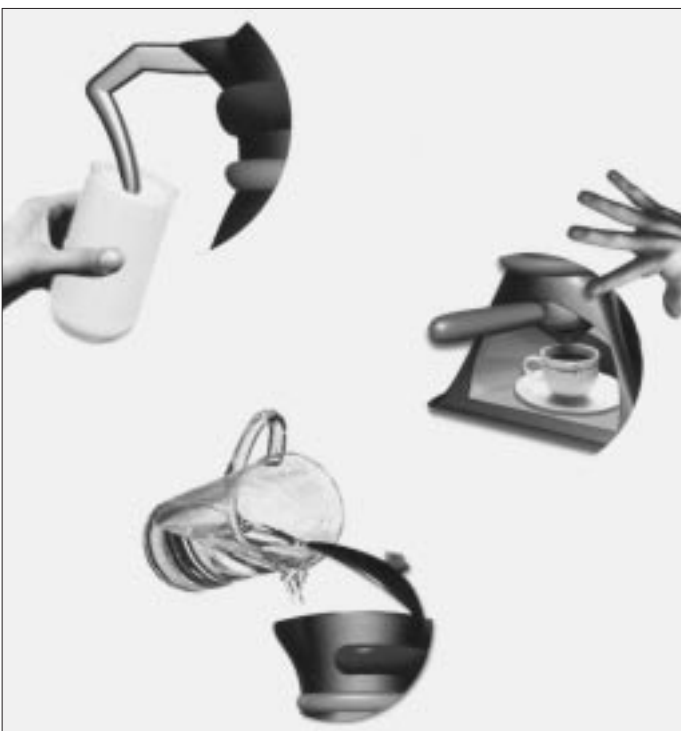

Ombretta Colli
Presidente Provincia di Milano

nünket, hogy higgyünk a "design rendszer" erejében, korszerűségében és fenntarthatóságában.

Így a jövőben is élvezhetjük majd a belső tereket, örülhetünk ételünk ízének, álmaink bolyongásának, miközben kedvenc olvasmányainkat lapozgatjuk.

Ebben az egészben bontakozik ki az új világ, "a dolce vita" világa...

Ombretta Colli
Milano megye elnöke

It is therefore, a great satisfaction for me to see such a beautiful product realised by our "system".

There is a great strength in all the items on display that I would like to underline: the totally Italian approach in creating environments, defining their contents and styles according to an interpretation of aesthetics, that is at the same time both beautiful and functional.

The combination of research for innovation and comfort, the taste to play and a shared intuition, together with the matrix of a consolidated tradition of knowing how to "do", clearly emerges in all of these products.

Moreover, the fact that these proposals are presented by a group of young designers in collaboration with important and consolidated enterprises permits us to grasp the strength and modernity of the "design system" and its duration over time.

So, we will still be able to live the "home" spaces enjoying the taste of our food, pursuing our dreams, in the company of our favourite literature.

In all this a new world of sweet life has been recreated- la dolce vita....
